

KEY EUROPE

Company profile and activity

Since 1998 Key Europe has been taking care of the distribution of car and home components and accessories in the international markets.

During the last 10 years, other 2 fields of activity were developed:

- Energy production and saving (cogenerators, voltage optimizers, and other different solutions)
- Swimming pools (units to produce drinkable water and system for energy saving of circulation pumps)

On every market Key Europe has distributors with exclusive agreements.

The network guarantees the distribution, the logistic and the after sales service
